

LEADING THE CHANGE TO A SAFE WORKING, SHOPPING & EATING EXPERIENCE

UV-CLEAN HELPS THE CLINK RESTAURANT TO BE COVID SECURE

THE CLINK RESTAURANT

ENS are proud to support The Clink Charity by helping make their training restaurant at HMP Styal, Cheshire safe with our UV-Clean solutions. The Clink is no ordinary restaurant. Its restaurants are situated within working prisons and their food is lovingly prepared and served by prisoners in training to gain their qualifications in order to reduce reoffending rates. The Clink Charity helps change attitudes, transforms lives and creates second chances <https://thelinkcharity.org/>

At The Clink Restaurant in Styal we installed UV Clean solutions to kill 99.9% of viruses and bacteria (including coronavirus) on staff and customer technology touchpoints. The UV-SA standalone solution ensures all payment terminals, mobile communications and tablets are disinfected after use by staff and customers. The UV-MM solution attached to the POS touchscreen automatically disinfects the screen after use by staff members. UV Clean from ENS ensures that staff and customer technology touchpoints are safe to use.

Catrin Aherne General Manager at The Clink Restaurant said:
"We have taken every step to be COVID secure both for our customers and learners including socially distanced tables, one way entry and hygiene processes. UV Clean from ENS is an excellent addition to our goal of COVID security and we are very grateful for their generous support."
