

The EU Waste Batteries and Accumulators Directive requires all Member EU countries to maximise the separate collection, treatment and recycling of waste batteries and accumulators. The UK Battery Regulations (derived from this Directive) applies to 3 types of batteries and accumulators placed on the market in the UK: Portable, Industrial, and Automotive.

Under Regulation 5 of the Batteries and Accumulators (Placing on the Market) Regulations 2008, “Producers” are required to mark all relevant batteries and battery packs placed on the market in the UK with the “crossed out wheeled bin symbol” to remind consumers not to discard batteries and accumulators in the domestic waste stream. Secure Retail encourages all of its customers to make note of this symbol and avoid putting any batteries in your domestic waste bin(s) or container(s).

Secure Retail supports the reuse and recycling of batteries as there are several environmental benefits of doing so, such as: Reduction of raw material and energy usage, prevention of landfill, prevention of hazardous and/or toxic materials present in some batteries contaminating the environment. As a Producer under the UK Battery Regulations, Secure Retail complies with its Producer Obligations by being registered as a Member of the BatteryBack Compliance Scheme and has been assigned the following Battery Producer Registration Number – **BPRN06917**.

As a Producer of Industrial Batteries, Secure Retail Ltd, offers free take back of waste industrial batteries from its B2B customers and final holders. Such industrial batteries can be returned to our premises in Coalville, Leicestershire. You will need to contact us first on +44 (0)1530 511150 or email us Info@secure-retail.com to obtain a returns reference number to allow us to process your battery disposal.

If you would prefer us to collect your industrial batteries from your premises, please contact us (as above) as there will be a transport charge for such industrial batteries from your premises and delivery of such industrial batteries to an Approved Battery Treatment Operator (ABTO) or Approved Battery Exporter (ABE). The charge will only cover the cost of transportation and handling and will not include any cost in relation to the treatment or reprocessing of such industrial batteries as defined by the UK Battery Regulations.
