

Introducing Secure Retail's PAX A920Pro Multi-Charge Dock

The A920Pro Android SmartPOS from PAX Technology is the upgraded version of the world's best-selling A920 mobile payment terminal. Powered by the fastest processor in the portfolio to simultaneously run the most complex applications under the highest levels of inbuilt payment security. The ultimate viewing experience is delivered on the A920Pro's brilliant 5.5-inch touchscreen, enabling you to better showcase logos, adverts, and video clips, creating multiple customer engagement opportunities.

At busy times, during shift changeovers, or if you have very high volumes of usage, you may want to have on stand-by fully charged batteries available when required.

Secure Retail have worked with our partners to develop the A920Pro Multi-Charge Dock that enables up to 20 batteries to be charged at the same time from one single power supply.

It is supplied with a 2M UK Mains Cable and can be surface or wall mounted.

The Multi-Charge Dock uses intelligent battery charging and sensing technology with over current protection, working in harmony with the batteries used in the PAX A920 devices to ensure fast, safe and trouble-free charging. Simple indicator LEDs denote charging status, or error status, for every battery that's located in the Dock.

Other Multi-Charge Dock solutions are available on request to suit a variety of requirements.

Fully CE tested and approved for total peace of mind.

Part Number 404340-2001 - Technical Specifications

Parameter	Specification
AC Input – Connector AC IN	85 – 264V AC, 50/60Hz, 2.5A Max, 150W Max
Battery Charging Output	4.2V, 1Amp current limit to suit Veken YW-008 Batteries
Input Connector	IEC 60320 C14 type
Operating Temperature	0°C to +40°C
Storage Temperature	-20°C to +70°C
Operating Environment	Sheltered environment, flat surface or wall mounted, free air. IP20
Dimensions	348mm(w) X 538mm(d) X 66mm(h)
Weight	4.0Kg (charger only)
